PROFILE

Full-Stack Developer with a strong backend focus and hands-on IT support experience. Specialized in building secure, real-time web applications, with solid understanding of system administration, networking fundamentals, and technical troubleshooting. Comfortable working across the full stack—from resolving low-level system issues to designing reliable and scalable application architectures.

EDUCATION

Diploma Full-stack Developer, Reboot01 Institute

01/2024 – present

Collaborated with peers on group projects, applying Agile practices in real-world development scenarios.

PROFESSIONAL EXPERIENCE

Personal IT Support Assistant

REGAL GULF TRAINING CENTRE

- Providing personal technical support for laptops and software
- Installing, updating, and troubleshooting programs
- Assisting with basic system setup and maintenance
- Provided technical support for staff and students, resolving hardware, software, and network issues.
- Performed basic network setup, connectivity troubleshooting, and device configuration.
- Managed user accounts, access permissions, and basic security practices.
- Diagnosed and resolved technical issues efficiently to minimize system downtime.

PROJECTS

Social Network Application

Go | SQLite | Next.js | TypeScript | Docker | WebSocket | REST API

- Built a full-stack social network with authentication, profiles, and role-based access.
- Implemented real-time chat and notifications using WebSockets.
- Designed secure backend services with Go and SQLite.
- Containerized the application using Docker for consistent deployment.

Forum

Go | SQLite | HTML | CSS | JavaScript | WebSocket

- Developed a single-page forum with user authentication and session management.
- Implemented posts, comments, and real-time interactions.
- Handled backend logic and data persistence using Go and SQLite.

Bombberman DOM Multiplayer Game

JavaScript | Custom JS Framework | WebSocket | requestAnimationFrame

- Built a real-time multiplayer browser game with synchronized gameplay.
- Developed a custom JavaScript framework for DOM handling and game logic.
- Implemented real-time player communication using WebSockets..

Student Dashboard (GraphQL) ⚡

HTML | CSS | JavaScript | GraphQL | JWT

- Developed an interactive dashboard for displaying student data using GraphQL.
- Built an advanced query system for dynamic data retrieval and analysis.
- Designed a responsive user interface with enhanced user experience (UX).

SKILLS

Languages | Frameworks

Golang | Java | Rust | Javascript | HTML | CSS | Node.js | Next.js | SQL | SQLite | GraphQL | Bash

Tools

Git | Docker | WebSocket | REST API | NPM

IT & System

IT Support & Troubleshooting, Networking Fundamentals

Windows, Linux, macOS

User Account Management, Basic System Security

CERTIFICATES

- Cisco Certified Support Technician (CCST)
